Preface

Chapter 1 . Outline of Technology and Research Center

1 . Preface	3
2 . History	5
3 . Organization	6
4 . Budget	9
5 . Research Facilities	9

Chapter 2 . Research & Development

I . Petroleum Engineering Research Team	
Outline of the Team.....	17
A . Basic R&D	
[Reservoir Engineering]	
I - A - 1 IOR/EOR Technologies	
(1) Research on Gas Flooding	
① Asphaltene Precipitation during Gas Injection in Carbonate Cores	22
② Measurement of Interfacial Tension at High Temperature and High Pressure Condition	25
(2) Fundamental Study on Air Injection for Application to Light Oil Reservoir	26
I - A - 2 Core & Fluid Analysis Technology	
(1) INCELA : Concept of Integrated Core Evaluation Laboratory	29
(2) Application of MRI Technology for Core Analysis	31
[Production Engineering]	
I - A - 3 Offshore Oil and Gas Field Development Technology.....	35
I - A - 4 Basic Research on Production Technology	39
I - A - 5 Corrosion Protection Technology	
(1) Optimization of Corrosion Resistant Material Selection with Dynamic Field Tester	43
(2) The Effect of Acetic Acid on Corrosion Behavior	46
[Drilling Engineering]	
I - A - 6 Research of the Optimization for Drilling Operation	
(1) Development for the Cuttings Transport Simulator	47
(2) Analysis & Improvement for the UBD Transient Hydraulics Simulator with Actual Data	51
C . Collaborative R&D with Private Companies	
I - C - 1 Technologies for Efficient Drilling Operations	
(1) Development of High Performance Bit for Hard Rock	54
(2) Technology for Improvement of Wellbore Stability of Shale Formatio	57
E . International R&D Cooperation	
I - E - 1 Optimization of Development Scheme in Agua Fria, Coapechaca and Tajin Areas, Chicontepec Basin	62

II . Geology & Geophysics Research Team	
Outline of the Team.....	67
A . Basic R&D	
II - A - 1 Research on Geochemical Properties of Oil and Gas	70
II - A - 2 Research on Sedimentary and Diagenetic Processes in Petroleum Systems	73
II - A - 3 Research on Detailed Delineation and Analysis of Geologic Structures by Seismic Data - Surface Consistent Deconvolution Optimized for Noisy Seismic Record -	77
II - A - 4 Research on Rock Physics - Development of Elastic Velocity Measurement System for Unconsolidated Rock Samples -	81
 III . Research Project Team on Carbonate Reservoir	
Outline of the Team.....	83
A . Basic R&D	
III - A - 1 Research on the Core and Fluid Analysis Technology (1) Micro-scale Flow Simulation by Lattice Boltzman Method	87
B . Applicable R&D	
III - B - 1 New Visions to Develop Low Permeable and Heterogeneous Carbonate Reservoirs (1) Seismic Attribute Guided Reservoir Characterization Study	
① Depositional Facies and High-Frequency Sequence Stratigraphy of a Carbonate Reservoir in Middle-East	93
② Advanced Processing Sequence for Multi-Azimuth Seismic Data - A Case Study for a Carbonate Reservoir in Middle East -	95
(2) Research on Water Injection Scheme Optimization in Heterogeneous Reservoir	
① Development of Upscaling Method to Predict Kro/Krw Rock-cures Based on Laboratory Experiments.....	98
② Application of Genetic Algorithm to History Matching for Core Flooding	101
③ Upscaling in Near-well Regions for Multi-phase Flow Effect	104
④ Multiphase Flow Meter for Intensive Watercut Monitoring - Stage-1 -	106
 IV . Research Project Team on Emerging Gas Technologies	
Outline of the Team	111
Gas to Liquids (GTL) Technology :	
B . Applicable R&D, Public Invitation for the Research Proposals	
IV - B - 1 Development of Novel Syngas Process Using Catalytic Partial Oxidation.....	115
IV - B - 2 Development of Upgrading and Utilization Technology for GTL Products	116
IV - B - 3 The Development of the Novel and High-efficiency Syngas Production System from Natural Gas	118
IV - B - 4 Development of Advanced Auto Thermal Gasification (A - ATG) Process	120
IV - B - 5 Development of New FT Catalyst to Produce Automobile Fuel.....	122
IV - B - 6 Development of Corrosion Resistant Alloy for GTL Syngas Process	125
IV - B - 7 R&D of Zeolite Membranes for Innovative Natural Gas Conversion Processes	126
C . Collaborative R&D with Private Companies	
IV - C - 1 Gas to Liquids (GTL) Technology	129
E . International R&D Cooperation	
IV - E - 1 Pertamina-JOGMEC Joint Feasibility Study of GTL Technology Project	131
IV - E - 2 Technical Collaboration on the Process Development for the RIPI § Ray OCM Technology ...	133
 Natural Gas Hydrates (NGH) Technology :	
B . Applicable R&D, Public Invitation for the Research Proposals	

IV - B - 8	Formation of Gas Hydrate Using Micro-Bubble	135
IV - B - 9	Development of an Advanced Hydrate-production Technology for Natural-gas Storage : Devising High-performance Production Processes Taking Account of Variable Crystalline Structures of Hydrates	137
C . Collaborative R&D with Private Companies		
IV - C - 2	Development of Natural Gas Hydrate Production Plant	139
IV - C - 3	Development of Natural Gas Hydrate Transportation Chain	141
DME (Dimethyl Ether) Utilization Technology :		
B . Applicable R&D, Public Invitation for the Research Proposals		
IV - B - 10	Improvement of Lubrication Property for DME Diesel Engine	143
IV - B - 11	Development of Compact and High-Efficiency DME Fueled Fuel Cell (DME - FC) System	145
IV - B - 12	Development of a Low-temperature DME Steam Reforming System for Fuel-cell Vehicles	147
C . Collaborative R&D with Private Companies, Public Invitation for the Research Proposals		
IV - C - 4	Demonstration of Low NOx Combustion Technology for DME Fueled Gas Turbine by Full Pressure Rig Test	149
IV - C - 5	Retrofit Application of DME fuel for Existing Boilers	151
IV - C - 6	R&D of Heavy Duty DME Diesel Vehicle	153
IV - C - 7	Practical Durability Fleet Test R&D of DME Vehicles	155
V . Methane Hydrate Research Project Team		
Outline of the Team		159
D . Investigation on Technologies		
V - D - 1 Research for Geo-Science Technologies		
(1) Application and Development of New Geophysical Survey Techniques		
①	Deep Tow Seismic Survey Techniques	163
②	4C Seismic Survey Techniques	164
③	Marine Electromagnetic Survey Techniques	166
④	Other Geophysical Survey Techniques (Well Geophysical Surveys)	168
(2) Studies of the Effectiveness of Geochemical Surveys in Development and Exploration		
①	Geochemical Surveys of the Nankai Trough Area	170
②	Development of Equipment for Measuring Formation Temperatures	171
③	Geological Evaluation for Nankai Trough Area	174
(3) Development of Techniques for Processing and Analyzing Seismic Survey Data		
①	Studies of the Effectiveness of Velocity Analysis	176
②	Studies of the Effectiveness of Special Processing of Seismic Survey Data	177
③	Studies of the Gas Hydrate Rock Physics Model	179
(4) Elucidation of the Method of Methane Hydrate Accumulation		
①	Research on Occurrence and Distribution of Methane Hydrate in Mackenzie Delta, Canada	180
②	Research on the Biomarker Analyses for the Methanogenic Archea and Methane Generation	182
③	Research on the Microbiological Analyses for Methane Generation	183
④	Research on the Formation of Methane Hydrates	184
⑤	Comprehensive Study for Mechanism of the Methane Hydrate Accumulations	185
(5) Evaluation Technique for Methane Hydrate Layers, and Acquisition of Data on Fundamental Physical Properties of Methane Hydrate		
①	Research on Electrical Logging Interpretation Technique in Methane Hydrate Layers ...	187

V - D - 2	Research for Drilling, Completion, Production and Development Technologies	
(1)	Onshore Production Tests	
①	Mallik Production Test.....	190
②	Second Onshore Production Test	191
③	Analysis and Assessment of Production Tests	192
(2)	Offshore Production Test Technology	
①	Research on Offshore Production Test Technology	194
②	Gulf of Mexico Survey JIP with Chevron/DOE, etc	196
(3)	Drilling and Completion Technologies for Methane Hydrate Offshore Well	
①	Several Trials for Methane Hydrate Offshore Well Technologies	198
②	Improvement of PTCS	200
(4)	Preliminary Feasibility Study for Methane Hydrate Development System	201
V - D - 3	Drilling Program of METI “ Tokai-oki to Kumano-nada ” Exploratory Wells	
(1)	Selection of Drilling Locations.....	204
(2)	Planning of the Drilling Program	206
(3)	Operation of the Drilling Program.....	208
VI	Public Invitation for the Research Proposals	211

Chapter 3 . Survey and Technology

I	Development & Production Team and Geology & Geophysics Team	
	Outline of the Team	215
I - 1	Outline of Technical Survey	217
I - 2	Survey of Offshore Development System	219
I - 3	Capital Cost Range Evaluation	223
II	Overseas Survey Team	
	Outline of the Team	227
II - 1	Outline of Iraqi Oil Fields	229
II - 2	Petroleum System of Mexican Gulf of Mexico	233
II - 3	Exploration Potential of Offshore Equatorial Guinea.....	237
III	Domestic Survey Team	
	Outline of the Team	241
III - 1	Joint Seismic Survey on the Continental Shelf JDZ of Japan and Korea in FY 2002	243
III - 2	Deep Sea Survey Technologies for Natural Resources in Japan in FY 2003	245
IV	Technical Information Team	
	Outline of the Team	247
IV - 1	TERDIS - a TEchnical Report, Data and Information System.....	249
IV - 2	National Data Repository (NDR) - an Online Data Management System	252

Chapter 4 . Technology Transfer

I	List of R&D and Survey Results	
1	Technical Papers Presented at Technical Societies	257

2 . Technical Papers Published	268
3 . Industrial Property Rights	271
II . International R&D and Survey Cooperation	
1 . Outline of the Activities	273
2 . Records of the Activities	273
III . Technical Support to Encourage Operational Challenge	
1 . Outline of the Activities	276
2 . Records of the Activities	276
IV . Training and Education	
1 . Outline of the Activities	278
2 . Records of the Activities	279
V . Conferences, Publications and Other Activities	
1 . Outline of the Activities	282
2 . Records of the Activities	284
