

# Contents

## Preface

### Chapter 1. Activities of Technology & Research Center

1. Summary of activities in FY 2005 .....	3
2. Organization and budget .....	4
3. R&D strategy .....	6
4. Plan for FY 2006 .....	8

### Chapter 2. Summary of TRC Activities

<b>I Oil &amp; Gas Technology Research &amp; Development Group</b>	
1. Petroleum Engineering Research Team .....	13
2. Geology & Geophysics Research Team .....	18
3. Research Project Team on Subsurface Technologies for Field Development .....	21
4. Research Project Team on Emerging Gas Technologies .....	24
5. Methane Hydrate Research Project Team .....	26
<b>II Oil &amp; Gas Survey and Technology Group</b>	
1. Development & Production Team and Geology & Geophysics Team .....	29
2. Overseas Survey Team .....	30
3. Domestic Survey Team .....	31
4. Technical Information Team .....	32
5. Seismic Vessel Project Team .....	34
6. Evaluation Team on HSE .....	34
<b>III Oil &amp; Gas Technical Strategy and Planning Group</b>	
1. Technical Planning & Coordination Team .....	36
2. Training Team .....	38
3. Technical assessment & Transfer Team .....	44
4. Business Coordination Team .....	47

### Chapter 3. Reports on R&D and Technical Survey Activities

<b>I Oil &amp; Gas Technology Research &amp; Development Group</b>	
<b>1. Petroleum Engineering Research Team</b>	
[Reservoir Engineering]	
(1) Formation Damage by Asphaltene Deposition on CO <sub>2</sub> Flooding Tests .....	51
(2) Fundamental Study on Air Injection for Application to Light Oil Reservoir .....	55
(3) Estimation of Wettability by MRI .....	58
(4) Evaluation on Reservoir Condition Core Flooding Test (Water Flooding) .....	63
(5) Digital Core Laboratory at the Pore-scale .....	68
(6) Research on Microbial Restoration of Natural Gas Using Indigenous Microbes in Oil/gas-fields .....	70
(7) Feasibility Study of AE (Acoustic Emission) Method for Fracture Delineation in Natural Gas Reservoir .....	74

(8) Optimization of Development Scheme in Agua Fria, Coapechaca and Tajin Areas, Chicontepec Basin .....	78
[Drilling and Completion Engineering]	
(9) Study on Drilling and Completion for ERD Well .....	83
(10) Evaluation by Actual Well Data and Development of Simulator for Cuttings Transport .....	85
(11) Improvement of Shale Instability Solutions: Implementation to a Giant Oilfield in the Middle East .....	87
(12) Development of Laser Drilling and Fracturing System .....	90
[Production Engineering]	
(13) Basic Research on Production Technology, Oil-Water Flow in Pipes .....	94
(14) Multiphase Flow Meter for Intensive Water Cut Monitoring at Abu Dhabi – Project Review and Future Technical Issues .....	99
(15) Gas to Wire System (GTW) with Minimal Gas Treatment and Optimum Power Generation Adjacent to Small Gas Field .....	103
(16) Survey of Application Limits for 3 % Cr Steels under Oil and Gas Producing Conditions .....	105
<b>2. Geology &amp; Geophysics Research Team</b>	
(1) Research on Geochemical Property of Oil, Gas and Source Rocks	
① Characterization of Oils and Source Rocks by Porphyrynes – Applications to Evaluate Depositional Environments of Source Rocks – .....	107
② Studies on Oil and Gas Migration; Analysis of Hydrocarbon Inclusions by Laser Micropyrolysis GCMS .....	110
③ Study for Geochemical Evaluation of Highly Matured Oils and Condensates – Application of Diamondoids as a New Tool for Hydrocarbon Characterization: An Example in the Middle East – .....	115
(2) Research on Laboratory Core Velocity Measurement and Rock Physics	
① Design and Construction of Rock Physics Database .....	119
② Elastic Velocity Measurements of Oil Sands and Bitumen under Reservoir Conditions .....	122
(3) Geochemical Evaluation and Basin Modeling in the Zagros Basin, Iran – Source Rock Potential of the Paleozoic Sequence – .....	127
(4) Time Lapse Seismic Survey in the Oil Sands Area – JACOS SAGD Operation Area, Athabasca, Canada – .....	132
(5) A Study of Marine Multicomponent Seismic .....	134
(6) Development of a Realtime Reservoir Monitoring System by 4-D Geoelectrical Techniques .....	138
<b>3. Research Project Team on Subsurface Technologies for Field Development</b>	
(1) Integrated Reservoir Characterization in a Middle East Oilfield .....	142
(2) Asphaltene Flocculation Analysis by Numerical Modeling .....	146
(3) Introduction of CAVLUP (CApillary-and Viscous-Limit UPscaling software) .....	149
(4) New Approaches to Develop Low-Permeable Carbonate Reservoirs By CO <sub>2</sub> Injection .....	152
(5) Hydraulic Fracturing Technologies in Horizontal Hole for Low Permeable Carbonate Reservoir – Phase 2 Study (Detail Design) .....	153
(6) Investigation of Shallow Anomaly Effects on Seismic Velocity .....	157
<b>4. Research Project Team on Emerging Gas Technologies</b>	
(1) Development of Advanced Auto Thermal Gasification (A-ATG) Process .....	160
(2) Development of Novel Syngas Process Using Catalytic Partial Oxidation .....	162
(3) Natural Gas Hydrate Formation Technology Using Micro-Bubble .....	164
(4) Research on Natural Gas Hydrate Production with Seawater .....	166

(5) Development of a Low-temperature DME Steam Reforming System for Fuel-cell Vehicles .....	168
(6) Development of Dimethylether to Propylene (DTP) Process .....	170
(7) Research and Development of Petrochemicals Production from Dimethyl Ether as a Raw Material .....	172
(8) Direct Synthesis of Liquefied Petroleum Gas .....	174
(9) Technical Collaboration on the Process Development for the RIPT's Ray OCM Technology (Phase II) .....	176
<b>5. Methane Hydrate Research Project Team</b>	
[Research for Geo-Science Technologies]	
(1) Research for Geophysical Technologies	
① Application of New Geophysical Survey Techniques .....	178
② Studies of Analyzing Seismic Data .....	180
(2) Research for Geological and Geochemical Technologies	
① Reinvestigation of the Effectiveness of Geochemical Surveys Based on New Model of Accumulation and Occurrence of Methane Hydrate .....	182
② Research on the Occurrence and Distribution of Methane Hydrate in the Nankai Trough Area, Offshore Tokai Japan .....	185
③ Research on the Formation of the Methane Hydrate .....	187
④ Improvement of Simulator for Methane Hydrate Accumulation .....	189
⑤ Log Analysis of 16 METI Exploratory Test Wells Drilled in the Nankai Trough .....	192
[Research for Drilling, Completion, Production and Development Technologies]	
(1) The Second Onshore Methane Hydrate Production Test at Mallik .....	194
(2) Long Term Monitoring System Development for the Second Onshore Production Test at Mallik .....	196
(3) Reservoir Engineering Aspects of Mallik Production Tests .....	197
(4) Production Test Technology .....	199
(5) Wellbore Stability of Hydrate Production Test Well .....	201
<b>II Oil &amp; Gas Survey and Technology Group</b>	
<b>1. Development &amp; Production Team and Geology &amp; Geophysics Team</b>	
(1) Survey of State-of-the-art EOR/IOR Technologies .....	206
(2) The Latest Trend in CSG Drilling and Expandable Tubular Technologies .....	211
(3) Trend Survey of the Production and Development Technologies for Oil and Gas Fields in the Polar Region .....	215
(4) Survey of Offshore Development Technology .....	220
(5) Trend Survey of the Evaluation Technologies for Natural Fractured Reservoirs .....	225
<b>2. Overseas Survey Team</b>	
(1) Evaluation of Petroleum System in Northeastern Sakhalin Offshore .....	229
<b>3. Domestic Survey Team</b>	
(1) Seismic Survey on the East China Sea in FY 2004, 2005 .....	232
(2) Deep Sea Survey Technologies for Natural Resources in Japan in FY 2005 .....	234
<b>4. Technical Information Team</b>	
(1) Implementation of a New Data Management System for a Shared Disk .....	236

5. Seismic Vessel Project Team  
 (1) Technical Survey of 3D Seismic Vessel and Technology .....239

<h2>Appendix</h2>
-------------------

I . Organization .....243

II . Budget .....244

III . Research Facilities

    1. Research Facilities .....245

    2. Software .....245

    3. Facilities .....248

IV . Activities in FY 2005

    1. Technical Assessment & Transfer

        (1) Conferences, Publications and Other Activities .....250

        (2) List of R&D and Survey Results

            ① Technical Papers Presented at Technical Societies .....252

            ② Technical Papers Published .....260

            ③ Industrial Property Rights.....262

        (3) Exhibition .....263

    2. International R&D Cooperation .....264

    3. Technical Support to Encourage Operational Challenge .....265

    4. Public Invitation for the Research Proposals .....265

    5. Commissioned Research for Universities and Public Research Institutes .....266

    6. Technical Support & Consultation .....267

    7. Training and Education .....270
